

## "Branded!" The J Brand Technology

### Some PCI DSS Quick Wins!

#### Control access to your PCI environment

- Issue authorized employees with either hard or software tokens to force 2 factor authentication (something you have, something you know)
- Issue 3rd parties once only keys to limit unauthorized access
- Log and monitor all authentication attempts

#### Protect against access from unknown environments

- Provide remote users only the specific resources they require on a per user basis with access through an SSL VPN portal
- Interrogate the remote users endpoint to establish which resources it is secure for them to access.

#### Remove administrative overheads and improve visibility

- Clientless VPN access through SSL portal with 2 factor authentication integration
- Application level auditing of remote access giving complete visibility on a per user basis.
- Self service 2 factor authentication keys for infrequent users.

#### Protect your critical systems and data

- Lock down what traffic is allowed to move between areas of your network with Zone firewalling
- Inspect all inter-zone traffic for Viruses, spyware, Intrusion detection and

*"It was a natural progression for J Brand to partner with an organisation like CETSAT who implement and support the software and systems that sit on the network infrastructure we install."*

## PCI Compliance - A Prioritised

With increasing pressure on Tier 2 + retailers to demonstrate rapid progress towards PCI DSS compliance, J Brands pragmatic approach allows clients to make quick and cost effective wins in many areas of the PCI standard.

However controlled your PCI environment is adopting new technologies will play a part in achieving and maintaining PCI compliance as the technology you adopt now must evolve to combat evolving risks.

### Why Re-invent the Wheel ?

We have combined proven security products from industry leading vendors to provide out of the box solutions to specific PCI requirements.

For some of the more complex requirements, with our partner CETSAT we can provide specialist technical resources to work with you and your QSA to design and implement technology solutions specific to your PCI environment.

To discuss your PCI requirements with one of our solu-

### The 13th PCI Requirement! – "Demonstrating you are Compliant"

Who gets the job of collating and sifting through the logs from all your network devices to trace a network breach?!

From open source SYSlog servers to RSA's EnVision appliance we can

### J Brand's new Strategic Partner

J Brand has recently partnered with IT consultancy CETSAT Ltd.

CETSAT is a Technology Consultancy firm and IT Service Provider. They aim to assist their clients by improving efficiency, cutting costs and enabling them to make better business decisions through the effective use of technology. Their consultancy packages include: Process Improvement, Solution Architecture, Business Intelligence, Software development and specialist technical services (SQL, network security, compliance, ...). CETSAT's Technical Services arm provide an outsourced IT department where clients can either opt to outsource all elements of their IT function or identify areas that compliment their in-house capabilities.
